You must know that Professional Scrum Master (PSM) has three levels:

- Firstly, **PSM I**. Achieving this certification will demonstrate a fundamental level of Scrum mastery. However, PSM I certificate provides understanding of Scrum as described in the Scrum Guide.
- Next up, PSM II. Attaining this certification showcases an advanced mastery of Scrum. Yet, holders of the PSM II certificate demonstrate their comprehension of the fundamental principles that underlie Scrum.
- Finally, PSM III. Earning this certification reflects an exceptional level of Scrum mastery. PSM III certificate holders, however, showcase a profound understanding of applying Scrum principles, and practices, and the Scrum Values.

PSM Professional Scrum Master I Glossary

1. Agile: A set of principles and values for software development that emphasizes collaboration, flexibility, and customer satisfaction.
2. Backlog: A prioritized list of items that the Scrum Team needs to work on during a Sprint.
3. Burn-down chart: A chart that shows the amount of work remaining in the Sprint Backlog over time, allowing the Scrum Team to track progress and identify potential problems.
4. Daily Scrum: A 15-minute time-boxed event where the Development Team synchronizes its activities and plans for the next 24 hours.
5. Definition of Done (DoD): A shared understanding of the criteria that a product increment must meet in order to be considered complete.
6. Empiricism: A framework for making decisions based on observation and experimentation.
7. Increment: It's the total of all Product Backlog items finished within a Sprint, along with the increments from all the prior Sprints.
8. Product Backlog: An ordered list of items that represent the work the Scrum Team plans to complete.
9. Product Owner: The individual tasked with optimizing the product's value and ensuring that the Product Backlog remains visible, transparent, and well-understood.
